

The John Webb's Windmill '**Buy-a-Brick**' scheme allows you to purchase a brick* to be placed in the restored structure of the Windmill. Buying a brick contributes to the repair and conservation of the Windmill and to its ongoing management and maintenance, helping ensure that it is a vital part of the community for years to come.

The new bricks will be individually handmade using traditional methods by Sussex Handmade Brick, established in 1896. The clay is carefully excavated from the quarry to the rear of the brick works providing minimal impact on the environment. The techniques used to make, dry and fire these bricks have not changed for hundreds of years and is true to the methods used when the windmill was first built in 1804.

Your purchase of a brick can be in a name, anonymous or dedicated to a cause or loved one.

*The purchase of a brick is a donation to the John Webb's Windmill restoration project, and not ownership of a physical brick.

How it works:

1. Purchase a brick

Individuals donate money to purchase a brick. The price per brick is £25 and includes a Certificate and Dedication on the virtual wall which will be displayed on our Website. To register your interest please contact buyabrickthaxted@gmail.com and we will respond to you. Contact details will be handled in compliance with our GDPR Policy.

2. Legacy

Each purchase with brick number and owners name will be visible on our on-line panel, which will be reproduced and displayed within the Windmill when it is re-opened to the public.

If you wish you can record a dedication for your brick, for example in loving memory of Name, or celebrating a significant event such as a marriage, birthday or achievement.

3. Fundraising

The scheme generates funds for Thaxted Windmill Trust CIO. All monies raised from brick purchases and any other donations will go wholly into the repair and conservation of the Windmill and its ongoing management and maintenance.

Thank you so much for your generous support.
